SUMMARY

Software Engineer with **2+ years of experience** building scalable, multi-tenant B2B SaaS platforms handling enterprise-scale workloads and **serving 100K+ users** across multiple corporate clients. Specialized in full-stack development using Node.js, TypeScript and React (TSX/JSX). Experienced in designing high-performance backend systems, AI/LLM integrations using AWS Bedrock and OpenAI, and responsive frontend applications focused on usability and scalability. Proven track record of delivering **10x performance optimizations**, architecting AI-driven automation pipelines, and building production-grade systems for bulk processing, analytics, assessments, and enterprise workflow automation.

WORK EXPERIENCE

Software Development Engineer (SDE-1) | Wizr

Jun 2024 – Present

Backend Architecture & Multi-Tenant Systems

- Architected and maintained multi-tenant backend systems for enterprise clients with custom SSO, role-based access, and tenant-specific business logic across 100+ database models
- Built scalable backend services using Node.js, TypeScript, PostgreSQL, and Prisma, optimizing critical APIs and SQL queries for up to 10x faster response times
- Designed webhook infrastructure, caching layers, and cron-based synchronization systems to improve scalability and system reliability
- Built automated certificate and report generation pipelines using Puppeteer and AWS S3 for large-scale assessment workflows

Frontend Engineering & Enterprise Dashboards

- Developed responsive frontend modules and enterprise dashboards using React (TSX/JSX), Next.js, Redux, and Mantine UI
- Built dynamic assessment, analytics, and admin interfaces focused on performance, usability, and scalability

AI/LLM Integration & Automation

- Integrated AI/LLM workflows using AWS Bedrock and OpenAI for bulk content generation and intelligent automation pipelines
- Engineered batch-processing systems with queue and status tracking, reducing manual content operations

Project Trainee | Mastek Ltd

Jun 2023 – Sept 2023

- Performed data operations and analytics using AWS Athena, writing optimized SQL queries across large-scale datasets for client activity analysis
- Built automated reporting dashboards tracking AWS resource utilization and client engagement metrics
- Gained foundational expertise in AWS cloud architecture, IAM policies, and data pipeline design

EDUCATION

KJ Somaiya College of Engineering | B.Tech | Information Technology

2024

CGPA: 9.01

KEY SKILLS

- TypeScript
- JavaScript
- Node.js
- React.js
- PostgreSQL
- AWS Bedrock
- OpenAI API
- System Design
- Multi-Tenant Architecture
